

Climate Vista

Driving board engagement for more effective climate change strategy

Our 'Climate Vista' sessions help boards to better engage with their climate context: Deepening awareness, establishing alignment, and enabling agency to drive more meaningful and appropriate action on climate. We do this by:

Understanding your position

Pre-session surveys assesses level of knowledge and engagement amongst the board and your workforce to inform tailoring of content. Also identifies possible drivers and barriers to change plus provides insight into level of strategic ambition to build into workshop material.

Enhancing knowledge & awareness

Tailored content ensures decision-relevant information for your climate context which will also answer your key questions. Content could include:

- Expert input on climate scenarios and impacts; physical and transition risks and opportunities
- Mapping of climate liability risks (including TCFD)
- How to evolve your culture and enable a climate resilient organisation through your people

Identifying needs & actions

Strategic debrief to inform next steps for board and employee engagement, identifying gaps in climate risk assessment and providing guidance on climate change strategy.

Making sure we answer your questions

Rising Investor Pressure

What are science-based targets, and is **net zero** the way to go? What are the **business benefits**?

Increasing legal & reputational risk

What are **others doing**? How do I know if we're **doing enough**?

Climate risks already apparent

How do I know that the **climate analytics** we've undertaken are right for us? Are we using the **right metrics**?

Climate regulation increasing

What should we be doing to get our **TCFD action** right? What else should I be **aware of**?

Understanding your specific situation:

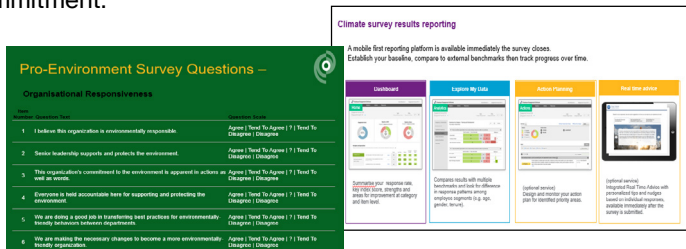

Board survey examples

Our board surveys help inform the tailoring of the workshop content by assessing the level of board engagement, awareness and knowledge of climate risks. This enables us to make the sessions as relevant as possible to the specific organization and board context.

Senior management and employee surveys

To understand more about what your employees think, you can add on Senior Management and Employee surveys. Our employee survey gathers perceptions of the organization's focus on and commitment to climate issues as well as levels of individual and team/manager role-model commitment.

Climate Vista three step process:

Creating shared awareness, alignment and agency

Pre-session	<ul style="list-style-type: none"> Pre-session planning call (~1hr) Surveys sent and analysed Session content developed and tailored Pre-read material provided
Session delivery 1-2hr session	<p>Potential agenda topics – will be selected and tailored based on survey feedback and organizational context and may include:</p> <ol style="list-style-type: none"> Introduction and context Climate science: sector specific physical risks, models, RCPs & SSPs, and scenarios Transition risks and opportunities International and national policy context Liability risk and requirements (TCFD) Organisational change and culture implications Requirements for creating an effective climate strategy Board survey results Q&A
Post-session	<ul style="list-style-type: none"> Post-session survey and analysis Strategic debrief call (~1 hr) – areas for future consideration

After Climate Vista

Equipped with a shared awareness, there are plenty of opportunities to explore potential next steps, for example:

Sector benchmarking

Physical and transition climate risk assessments and scenario analysis

Priority action planning

Employee engagement
