1. From the April 2001 publication all figures on this page have been shown on the seasonally adjusted basis; comparisons with earlier editions may show small differences. Every month the ONS revise figures from 14, 13 and 12 months ago, as well as two months ago and the previous month. All figures for the last 14 months should therefore be treated as provisional.
2. The Average Earnings Index was rebased in October 2003; the weightings were also amended and all amendments were applied historically. Consequently, the figures may not be consistent with previous issues of Watson Wyatt Statistics. Details of the changes appeared in the office for National Statistics First Release for September.
3. The seasonal adjustment of AEI has been reviewed annually and a final review was published on the ONS website on Wednesday 24 November 2010. This will ensure that the final seasonal adjustment of AEI series is optimal. AEI outputs that are not seasonally adjusted will not be affected by this update.

1. The AWE series published above is the equivalent measure to the AEI series previously published, that is, total pay – whole economy – seasonally adjusted – including bonus – excluding arrears. In addition, separate AWE series for Regular Pay and Bonus Pay are published by the Office for National Statistics. Series are also published segregating average weekly earnings by sector.
2. From October 2010, the AWE data set will be published based on the 2007 Standard Industrial Classification (SIC 2007). The main changes to the AWE series published based on the whole economy involve a revision to the weighting of the series between employers and an update of the parameters used to apply seasonal adjustment. Figures in the tables above have been re-estimated under SIC 2007.
3. The seasonal adjustment in the AWE is subject to annual review. The most recent review was completed in February 2020 and included revisions to all seasonally adjusted series in all months (including historic data from January 2000 onwards).
4. The Average Weekly Earnings data series (including historic data from January 2000 onwards) was revised from June 2017 to reflect the implementation by the ONS of improvements to earnings estimates for small businesses. Further information is available at <https://www.ons.gov.uk/employmentandlabourmarket/peopleinwork/earningsandworkinghours/articles/improvementsstoearningsestimatesforsmallbusinessesinaverageweeklyearnings/2017>
5. The Average Weekly Earnings data series (including historical data from January 2000 onwards) was revised from January 2019 due to a review of the seasonal adjustment process, utilising the latest information from the Annual Survey of Hours and Earnings to improve the estimation of earnings of employees of small businesses and the addition of real AWE estimates from 2000 to December 2004, facilitated by the publication of pre-2005 CPIH estimates by the ONS.

*Following notification of an administrative error by Royal London (formerly Co-operative Insurance (CIS)), the rate shown with effect from April 2009 onwards has been amended to 0.00%. The rate offered by Royal London (formerly Co-operative Insurance (CIS)) is based on its Deposit Pension Fund, guaranteed to pay a rate of interest equal to the Bank of England base rate as long as the rate remains above 1%, otherwise it is 0.00%.

* No contributions are payable if total earnings are less than the Primary Threshold.

** Contracting out rebates have been abolished effective 6 April 2016.

*** Rate proposed from April 2022.

± Negative rates which apply to employees as an offset to contributions on higher earnings; if the net contribution is negative, it is offset against the total employer contribution.

* No contributions are payable if total earnings are less than the Primary Threshold.

+ For contracted-out money purchase schemes.

Figure 11. Flat Rate Contracting-out Abatement

2009/10	£4,940 – £13,900	£31,801 – £40,040	£13,901 – £31,800		
2010/11	£5,044 – £14,100	–	£14,101 – £40,040		
2011/12	£5,304 – £14,400	–	£14,401 – £40,040		
2012/13**			£14,701 – £40,040	£5,564	£88.40
2013/14			£15,001 – £40,040	£5,668	£91.00
2014/15			£15,101 – £40,040	£5,772	£92.00
2015/16			£15,301 – £40,040	£5,824	£93.60

The introduction of the flat rate, Single-tier State pension from 6 April 2016 means that there is no further accrual of S2P pension from this date.

* The State second pension (S2P) started to move to a flat rate scheme in April 2009 when the level of earnings for S2P accrual was frozen at an upper accrual point of £770 per week (£40,040 per annum). The 10% and 20% bands were then merged in April 2010.

** In 2012, S2P was simplified, provided earnings exceeded the lower earnings limit (LEL), S2P would be the flat rate amount plus (10% of earnings in the 10% band divided by 44) all revalued.

Figure 18. **HMRC Limits**

Fiscal Year	12/13(£)	13/14(£)	14/15(£)	15/16(£)	16/17(£)	17/18(£)	18/19(£)	19/20(£)	20/21(£)	21/22(£)	22/23(£)
Lifetime Allowance	1,500,000	1,500,000	1,250,000	1,250,000	1,000,000 ³	1,000,000 ³	1,030,000 ³	1,055,000 ³	1,073,100 ³	1,073,100 ³	1,073,100³
Annual Allowance	50,000	50,000	40,000	80,000 ¹	40,000 ²	40,000 ²	40,000 ²	40,000 ²	40,000 ²	40,000 ²	40,000²
Money Purchase Annual Allowance	–	–	–	10,000	10,000	4,000 ⁴	4,000 ⁴	4,000 ⁴	4,000 ⁴	4,000 ⁴	4,000⁴

The annual allowance limit applies to pension input periods ending in the fiscal year shown.

1. From 2015/16 onwards, a lower limit of £10,000 applies to DC pension input once DC benefits have been accessed flexibly.

2015/16 was split into two 'tax' years for annual allowance purposes – the pre-alignment period up to 8 July 2015 and the post-alignment period. All pension input periods open on 8th July 2015 were closed and the next pension input period was from 9th July 2015 to 5th April 2016.

The annual allowance for the pre-alignment period was £80,000. The annual allowance for the post-alignment period was nil, but up to £40,000 could be carried forward from the pre-alignment period to the post-alignment period, and this must be used before any carry forward from earlier periods.

Further details are available at <https://www.gov.uk/hmrc-internal-manuals/pensions-tax-manual/ptm058000>

2. The Annual Allowance is tapered for 'adjusted incomes' of over £240,000 (£150,000) by £1 for every £2 of income earned over £240,000 (£150,000) with a maximum reduction of £36,000 (£30,000). Thus, the annual allowance will range from £40,000 for incomes of up to £240,000 (£150,000) to £4,000 (£10,000) at income levels of £312,000 (£210,000) and above. This doesn't apply for members with a threshold income' of £200,000 (£110,000) or lower.

The figures in brackets applied to the tax years 2016/17 to 2019/20. No taper applied prior to 2016/17.

Further details are available at <https://www.gov.uk/hmrc-internal-manuals/pensions-tax-manual/ptm057000>.

3. The Lifetime Allowance (LTA) reduced to £1,000,000 from April 2016 and was to increase in line with CPI (rounded up to the nearest £100) from April 2018 onwards. This was set out in Finance Act 2016 which amended Finance Act 2004. However, the LTA was frozen at its 2020/21 level until 2026 in the 2021 Budget with the changes implemented by the Finance Act 2021.

For information on Annual Allowance – <https://www.gov.uk/tax-on-your-private-pension/annual-allowance>

For information on Lifetime Allowance – <https://www.gov.uk/tax-on-your-private-pension/lifetime-allowance>

4. From 2015/16 onwards, a lower limit of £10,000 applied to DC pension input once DC benefits have been accessed flexibly. This limit was then reduced again, to £4,000, in 2017/18.

[†] From 6 April 2006 legislation no longer required pension schemes to apply the pension scheme earnings cap. Between 6 April 2006 and 5 April 2011 overriding legislation enabled schemes that wished to retain the cap to do so without amending their rules.

From 6 April 2011 this legislation no longer applies and if the cap is to be retained the rules must specify this and set out how the cap will be calculated. The figures shown above reflect our understanding of the calculation method set out in s590C Income and Corporation Taxes Act 1988.

Figure 21. DC quality test for automatic enrolment

Automatic enrolment earnings threshold

	2019-20	2020-21	2021-22	2022-23*
Lower level of qualifying earnings	£6,136	£6,240	£6,240	£6,240
Earnings trigger for automatic enrolment	£10,000	£10,000	£10,000	£10,000
Upper level of qualifying earnings	£50,000	£50,000	£50,270	£50,270

Minimum Contribution Rates

	Pay definition	Minimum contribution rates					
		Employer's staging date to 5 April 2018		6 April 2018 to 5 April 2019		6 April 2019 onwards	
		Total	Employer	Total	Employer	Total	Employer
Individual test	Qualifying earnings	2%	1%	5%	2%	8%	3%
Set 1	Pensionable earnings	3%	2%	6%	3%	9%	4%
Set 2	Pensionable earnings – but must be at least 85% of gross pay on average	2%	1%	5%	2%	8%	3%
Set 3	Gross pay	2%	1%	5%	2%	7%	3%

1. Pensionable earnings must be at least equal to basic pay and will be defined in the scheme rules.

2. Different Sets can be used for different sections of the workforce.

3. Any difference in total minimum contribution and employer minimum contribution needs to be covered by staff contribution. However, an employer may elect to cover the total minimum contribution, in which case staff contribution would not be needed.

4. Increases in minimum contribution coming into effect in 2018 and 2019 respectively do not apply in case of defined benefit schemes.

5. *Proposed Figures

For more information on automatic enrolment visit: <http://www.thepensionsregulator.gov.uk/>

The increase in UK equity dividends is the increase in the net dividend (actual dividend from April 1999).

*AEI: Increase in Average Earnings Index.

**AWE: Increase in Average Weekly Earnings.

Every month the ONS revise earnings figures from 14, 13 and 12 months ago, as well as two months ago and the previous month. All earnings figures for the last 14 months should therefore be treated as provisional. The AWE data series (including historic data from January 2000 onwards) was revised from June 2017 to reflect the implementation by the ONS of improvements to earnings estimates for small businesses.

National Insurance contribution rates

Before 6 April 1999 there were two rates of employees' contributions, and contributions were payable at the higher rate only on the band of earnings above the threshold for that rate. Employers' contribution rates depended upon the band in which the employees' earnings fell, but then applied to **all** earnings.

From 6 April 1999 the contribution rates apply only to the band of earnings indicated (the maximum of the upper earning limit applies only to employees' contributions). The negative employer rates from contracting-out schemes below the earnings threshold represent rebates payable to the scheme.

The contracted-out rates are the full rates reduced by the contracting-out abatement, and apply to earnings between the Lower Earnings Limit and the Upper Earnings Limit.

For all years, employers pay full-rate National Insurance (with no contracted-out rebate) for all earnings above the Upper Earnings Limit.

Pensions increase (review) orders

Pensions commencing after the given date receive a lower increase.

Bank base rates

The rate shown at any given date is the rate charged by most of the major clearing banks at that date. The rates charged by all the main banks tend to rise or fall in line with each other. However, the date of a change in rate may vary between banks by a few days, and occasionally one of the large banks may maintain a different rate from its competitors.
