Bringing your data to life

# Financial Results Analyzer

Financial Results Analyzer is an automated Enterprise Reporting Solution that supports and connects your actuarial and accounting teams

Financial Results Analyzer provides fast and intuitive insights for users reporting under the IFRS 9 & 17 accounting standards — in a transparent, controlled, and efficient way.

Available as part of the award winning WTW IFRS 17 Enterprise solution, or as a standalone module — Financial Results Analyzer uses high levels of automation in a governed and auditable environment, and for IFRS 17 it delivers the key calculations, actuarial detail and sub-ledger reporting capabilities in a form that generates wider business value.

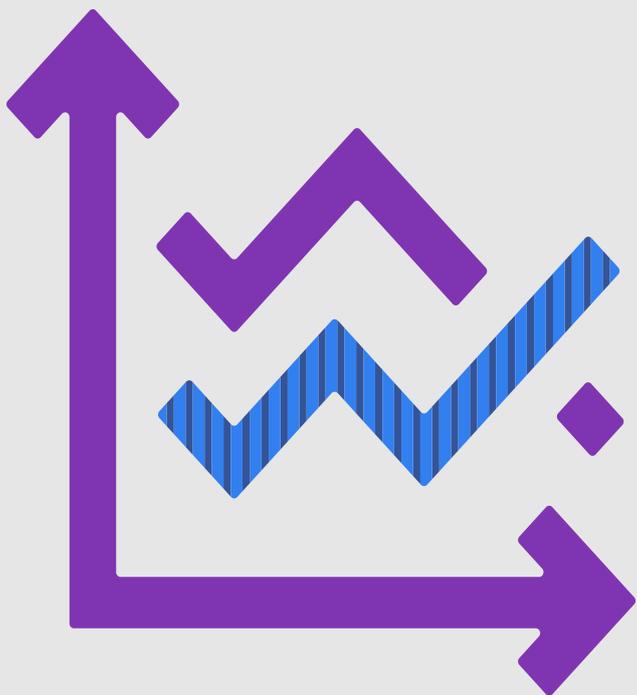

The solution is designed to meet the reporting requirements of insurers and reinsurers in both the life and non-life sectors — with extensive disclosure level reporting for IFRS 9 & 17.

A modular concept and customizable implementation approach gives the flexibility to fit with a client's existing systems and processes; acting as a reporting hub for IFRS 17 and non IFRS 17 data, including planning and forecasting — whether generated from WTW tools or from non-WTW tools.

## Benefits at a glance

- A reporting hub that gives fast access to data from multiple sources.
- Gives context and meaning to the results by calculating key metrics and supporting side-by-side analysis over time, across portfolios, and by version — all against forecast/plan.
- Enables users to see the results in new ways through innovative analytics and dashboards with pre-built Power BI reporting.
- A common solution allowing actuaries and accountants to interrogate the same data and ensure they are working off “one version of the truth”.
- The ability to store and manage detailed results to support internal and external reporting and “what-if?” scenarios.
- Solution is governed and automated by Unify.

## The architecture explained

Financial results data from multiple sources are mapped to the WTW Data Model and processed into the Financial Results Analyzer using our workflow automation tool 'Unify' – which is built-in and provides governance, automation and seamless connectivity to other client systems.

Reports are pre-built against the Data Model allowing results to be analyzed and presented 'out-of-the box', including the IFRS 17 and related IFRS 9 disclosures which are pre-built into the solution. The outputs are structured for 'slice-and-dice' analysis of the results at varying levels of granularity.

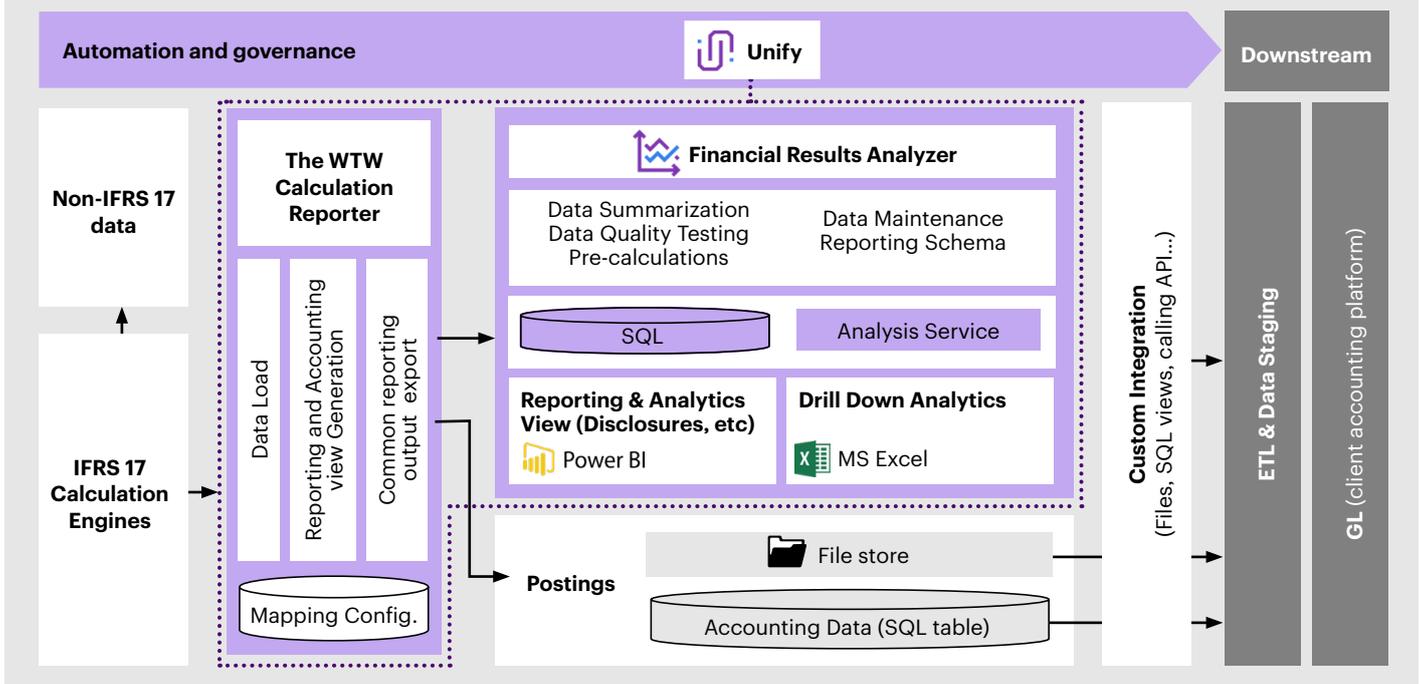

Using the flexible Data Model the solution supports the rapid production of dashboards and visualizations, allowing Client customization of the pre-built reports whilst maintaining an automated and governed environment.

## What makes the solution different?

Financial Results Analyzer meets the needs of reporting under IFRS 9 & 17 reporting, where the actuarial and accounting reporting requirements are far more interdependent; and where the need for a well-structured, automated, and controlled data model is vital.

Targeting cost effectiveness and process efficiency, we have designed a system and Data Model based upon our deep industry expertise and practical experience of numerous implementations globally. A flexible solution which can both plug in to existing WTW technology or acts as a hub for other data sources to create a complete Financial Reporting solution.

Figure 1. Financial Results Analyzer – where it fits in the process

### 1. Disclosures

- Pre-mapped financial statements and disclosures
- Ability to filter and analyze the results

### 2. Analysis capability

- 'Slice and dice' the results using Power BI or Excel
- Extensive 'drill-down' capability built into Data Model

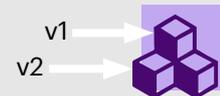

### 3. Analysis dashboard

- Pre-built KPI dashboards reflect new approaches
- Internal checks and validations

### 4. Managing the reporting process

- Combine results for life and non-life with alternative hierarchies for reporting
- Stores historical versions of results to support comparative analysis and trending
- Manages difference 'states' of results to aid reporting

## Key Risk Warnings

This section contains important regulatory disclosures and risk warnings that are relevant to the content of this document. You should read this section carefully, as it is intended to inform and protect you.

- Towers Watson Limited (trading as WTW) and Willis Towers Watson Investments GmbH have approved this marketing material for issue to recipients in the UK and Germany respectively, who are categorized as Professional Clients only.
- The value of all investments and the income from them can go down as well as up. This means you could get back less than you invested.
- Changes in exchange rates may cause the value of investments to decrease or increase.
- Past performance is not a reliable indicator of future returns.
- The document contains figures that refer to simulated past performance, which is not a reliable indicator of future returns.
- Expected performance is not a reliable indicator of future returns.
- Tax treatment depends on the individual circumstances of each investor and may be subject to change in the future.
- Private markets refer to investments not traded on a public exchange or market.
- Investors should regard an investment in private markets as a long-term investment which carries higher risk than many other forms of investment.
- There is usually less transparency in place around the management of private markets investments given the lower disclosure requirements. In general, there is limited information available on the investments and performance of the underlying portfolio companies and assets, other than annual or semi-annual financial statements, or sometimes, quarterly reports.
- Such investments are more difficult to value given that they are not traded on a public exchange or market.

## Regulatory Status Disclosure

Towers Watson Limited (trading as WTW) is authorized and regulated in the United Kingdom by the Financial Conduct Authority (FCA Register Firm Reference Number 432886, refer to the FCA register for further details) and incorporated in England and Wales with Company Number 05379716. Willis Towers Watson Investments GmbH (Office: Ulmenstraße 30, 65325 Frankfurt) is authorized and regulated in Germany by the German Financial Supervision Authority (BaFin – Bundesanstalt für Finanzdienstleistungsaufsicht) and incorporated in Germany with Company Number HRB 54178, registered in Frankfurt/Main. LEI 875500ZEA057SAXDQ134.

## Disclaimer

Towers Watson Limited (trading as WTW) is authorized and regulated by the Financial Conduct Authority in the UK.

## About Insurance Consulting and Technology
